Percentage of S136 referrals assessed within 3 hours of arrival: This position has deteriorated as a result of sickness within the AMHP Team within LYPFT. This has resulted in referrals having to be made to Adult Social Care, their response times, and the delays as a result. We have also experienced some challenges regarding the recording of the assessment. Assessors have been recording the time of the assessment being complete, which can take several hours depending on the potential outcome as opposed when the initial assessment has started.

Number of calls (attempted) to SPA by Month: We have seen the fall in calls to SPA since May 2024 as a result of the new NHS 111 Mental Health helpline becoming live.

Crisis Assessment Unit (CAU) Average length of stay at discharge (days): The length of stay on CAU has seen an increase as a result of 2 of the 6 beds being occupied by services users who are ready for discharge. The CAU continues to be functioning as an acute ward due to the ongoing capacity and demand challenges across the service.

Average Length of Stay (days) current adult acute inpatients (month end snapshot): Whilst we are seeing an improving picture, we still have a number of complex cases who require additional packages of care to be put in place before they can be discharged and a number who still require access to accommodation in order to be discharged.

Clinically Ready for Discharge Adult Acute Inpatients: As a result of changing the definitions in relation to Clinically Ready for Discharge, we have seen an increase in the number.

Clinically Ready for Discharge Older Adults Inpatients: As a result of changing the definitions in relation to Clinically Ready for Discharge, we have seen an increase in the number. We are also seeing the delays with organising funding and packages of care continuing to be a challenge, but the service is better sighted on who can be clinically moved at an earlier date which has enabled them to start building processes to support quicker discharges i.e. identifying an estimated date of discharge and convening more frequent 'barriers to discharge meetings' as necessary.

Services: Our acute patient journey

Number of admissions to adult facilities of patients who are under 16 years old	Number of admissions to inpatient services, excluding Child and Adolescent Mental Health Services (CAMHS), where the service user was aged under 16 on the day of admission.
Crisis Assessment Unit (CAU) bed occupancy	Of the total number of available beds on the ward and the number of days each bed was available, the proportion of those days where a bed was occupied. For example, on a 10-bed ward in the month of April where no beds were unavailable due to maintenance/repairs, etc., there are 300 available bed days. Where there were service users in beds for 150 of those days, this would result in 50% occupancy.
Crisis Assessment Unit (CAU) length of stay at discharge	For all the discharges from the Crisis Assessment Unit in the period, the average number of days each service user stayed on the ward.
Liaison In-Reach: attempted assessment within 24 hours	Of all the service users assessed by Hospital Mental Health Inreach following referral from Leeds Teaching Hospitals Trust (LTHT), the proportion that were assessed within 24-hours of referral.
Bed Occupancy rates for (adult acute excluding PICU) inpatient services:	Of the total number of beds available in the period on Adult Acute wards, excluding Psychiatric Intensive Care Unit (PICU), the proportion where a service user was occupying the bed.
Bed Occupancy rates for individual wards (multiple measures)	Of the total number of beds available in the period on the ward, the proportion where a service user was occupying the bed, including any leave days.
Percentage of CRFD	Of the total number of occupied bed days in the period, the proportion where the service user was ready for discharge from inpatient care.
Out of Area Trajectory Active Placements at Month End (multiple measures)	The total number of out of area placements active at the end of the period, where the placement was not the result of patient choice e.g. where a staff member needed inpatient care.
Total: Number of out of area placements beginning in month (multiple measures)	The total number of all out of area placements that begin during the period.
Total: Total number of bed days out of area (new and existing placements from previous months) (multiple measures)	The total number of occupied bed days that take place as part of an out of area placement during the period, regardless of whether the placement started during or before the period.
Cardiometabolic (physical health) assessments completed: Inpatients (quarterly)	Of the number of service user on a ward at the end of the period, the proportion with all elements of the cardiometabolic assessment completed within the same admission, and during the previous 12-months.

Services: Our Community Care

Percentage of inpatients followed up within 3 days of discharge (Trust Level monthly local tracking)	Of all discharges from Trust inpatient services, the proportion where the service user received a direct, attended, face-to-face, video or telephone contact within 3-days of discharge (excluding day of discharge).
Percentage of inpatients followed up within 3 days of discharge (HCP commissioned services only)	Of all discharges from Trust Leeds Healthcare Partnership (HCP) commissioned inpatient services, the proportion where the service user received a direct, attended, face-to-face, video or telephone contact within 3-days of discharge (excluding day of discharge).
Number of service users in community mental health team care (caseload)	Number of service users allocated to a named member of staff in an Adult or Older People's community team at the end of the period (waiting list allocations are excluded).
Percentage of referrals to memory services seen within 8 weeks (quarter to date)	Of the number of service users referred to the Memory Assessment Service (MAS) from an external source that do not have a prior Dementia diagnosis, that receive a first direct, attended face-to-face or video contact, the proportion that receive the first contact within 8-weeks of referral.
Percentage of referrals to memory services with a diagnosis recorded within 12 weeks (quarter to date)	Of all the referrals where the service user receives a Dementia diagnosis in the period, the proportion where the diagnosis was given within 12-weeks of referral.
Early intervention in psychosis (EIP) or at risk mental state (ARMS): Percentage starting treatment within 2 weeks	Of the referrals where a care coordinator allocation starts in the period, or the first direct, attended, face-to-face, video or telephone contact in the referral took place in the period, the proportion where the latest of these two events, took place within 14-days of referral.
Early intervention in psychosis (EIP) : Percentage of people discharged to primary care (quarterly)	Of all the referrals discharged from the Early Intervention in Psychosis service in the period, the proportion where the service user was referred back to Primary Care.
Cardiometabolic (physical health) assessments completed: Early Intervention in Psychosis Service (quarterly)	Of the total number of referrals open to the Early Intervention in Psychosis (EIP) service with a care coordinator allocation active at the end of the period, the proportion with all elements of the cardiometabolic assessment completed during the previous 12-months.

Services: Clinical Record Keeping

Percentage of service users with NHS Number recorded	Of all the referrals open during the period, the proportion where the service user's NHS number is recorded on their CareDirector record.
Percentage of service users with ethnicity recorded	Of all the referrals open during the period, the proportion where the service user's ethnicity is recorded on their CareDirector record. Where a service user declines to provide an answer, this is counted as complete; however, any ethnicity recorded as 'Unknown' is not counted as complete.
Percentage of service users with sexual orientation recorded	Of all the referrals open during the period, the proportion where the service user's sexual orientation is recorded on their CareDirector record. Where a service user declines to provide an answer or their sexual orientation is recorded as 'Unknown', this is counted as incomplete.

DQMI (MHSDS) % Quality %

The Data Quality Maturity Index (DQMI), is a weighted score based on the completeness and quality of several fields in the Trust's Mental Health Services Dataset (MHSDS) submissions to NHS Digital. The score is derived by NHS Digital from the MHSDS submission and published on their website 3-4 months later.
