

Wear your PPE for effective protection

Always wash your hands when donning and doffing PPE

COVID-19 Safe ways of working

MAXIMUM PROTECTION

PPE

Wear all your PPE for effective protection

Visors / goggles: Wear eye protection as standard

Wearing a visor protects against droplets. Ensure you clean your visor with a disinfectant after use. 37% of visors when tested after use were found to be contaminated

Masks

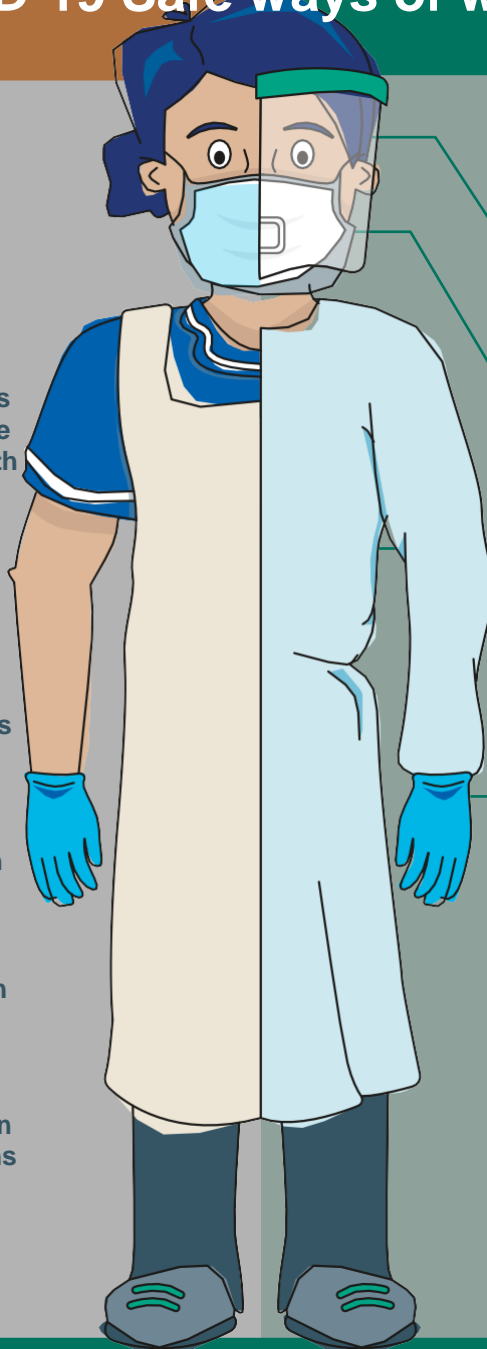

Wearing a mask reduces contamination by 99%

Gloves

Change gloves between each intervention and wash your hands. Regularly changing gloves results in a clean state in 80% of cases.

Aprons/coveralls

Significantly reduces skin exposure. Change aprons between each intervention.
