

## How we did this time compared to our last comprehensive inspection in 2014: A quick guide

2014 Inspection outcome	2016 Inspection outcome
Overall rating: requires improvement	Overall rating: requires improvement
70% of the service domains rated Good.	77% of the service domains rated Good or Outstanding
0 out of 60 domains = Outstanding	3 out of 65 domains = Outstanding
43 out of 60 domains = Good	47 out of 65 domains = Good
14 out of 60 domains = Requires improvement	15 out of 65 domains = Requires improvement
3 out of 60 domains = Inadequate	0 out of 65 domains = Inadequate

### Key highlights

Following the 2014 inspection the Trust received only one rating of good at provider level. In 2016 it received two ratings of good at provider level.

For the 2016 inspection our Deaf CAMH Service received an outstanding rating.

In 2014 the Trust received an inadequate rating for inpatient wards for older people. In 2016 this service received an overall rating of good.

### How the CQC came to their decisions on ratings

We have received some supplementary guidance from the CQC on how they came to their decisions on our ratings.

At core service level - one regulatory breach in a domain restricts that domain to a 'requires improvement'

At provider level, if three or more of the core services have been rated as 'requires Improvement' you cannot achieve more than a 'requires improvement' at provider level, which explains our overall ratings.

Based on the regulatory breaches and their rules-based approach, the overall judgement for LYPFT remains 'requires improvement'.
