

Would you like to influence how the Trust develops?

Help us to recruit staff across the organisation

Join the people's panel... A team of service users and carers who have experience of using Trust mental health services. You will work alongside staff during interviews to champion the values needed for improving health and lives.

In return for your time and professional assessment, we will offer you training and support as well as expenses and refreshments/lunch.

You don't need any previous experience with interviews to take part.
