

Gender Outreach Workers

Supporting trans, non-binary and gender diverse people on the Leeds Gender Identity Service waiting list and care pathway

You may have questions. You might want to talk with someone with lived experience. Gender Outreach Workers can offer advice and support from the point of your referral to Leeds Gender Identity Service. We can provide one to one support sessions in person, by phone, and online video. We also run peer support groups and can signpost to others in your area.
